RESTRICTION REQUIREMENT

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-13 and 21-25, drawn to a method for retaining oil in germ while separating a pericarp/starch fraction and the germ resulting from said process, classified in class 426, subclass 489.
 - II. Claim 14, drawn to a germ product, classified in class 426, subclass 629.
- II Claims 15-20, drawn to a separation system, classified in class 99, subclass 537.

 The inventions are distinct, each from the other because of the following reasons:
- Inventions I and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)).)). In this case, the apparatus may be used to separate non-food materials from plant material, such as, for example, medicinal products.
- 3. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product may be made by a different process wherein corn is dry milled followed by a step wherein the germ is separated using vibrating gravity tables.
- 4. Inventions III and II are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the

Application/Control Number: 10/707,654

Art Unit: 1761

apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case, the product may be made by an apparatus or apparatus combination comprising a dry milling portion and vibrating gravity tables.

- 5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anthony Weier whose telephone number is 571-272-1409. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Milton Cano can be reached at 571-272-1398. The fax phone numbers for the organization where this application or proceeding is assigned are 703-305-3602 for all
